

BIRDWATCHING QUIZ ANSWERS REVEALED!

There are some regular feeder birds, a couple of tricky ones like the American Goldfinch in winter plumage, and then some bonus birds that would never be at the feeder....MONA!!! NOT FAIR!!!!

White Pelicans, Sandhill Cranes, Pileated Woodpecker, Flying Squirrel - (this one would actually be on the feeder...) and Oh! A Canada Warbler (rare/endangered).

Sneaky MONA!!!

Scientists! Can you match the bird with the photo?
